DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a method for accessing a network by a customer, selecting items to view, for dynamically displaying images of items in response to a customer's request and for assigning a token to said customer to make a purchase.
- II. Claims 6-10 and 11-12, drawn to a method for searching a merchant inventories for items to meet a customer's specifications, notifying a customer of available of items and for compensating a referring merchant.
- III. Claims 13-20, drawn to a system comprising an entry portal, a session management communicating with said entry portal and a customer database accessible by said session management module for storing customer registration and transaction history.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III, for instance, are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that

Art Unit: 3622

the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination has separate utility such as a system comprising an entry portal, a session management communicating with said entry portal and a customer database accessible by said session management module for storing customer registration and transaction history.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
